CAREER PROFILE

Master's graduate in Information Technology (AI & Data Science) from UNSW, Sydney, with strong experience in AI-driven applications, full-stack development, and cloud computing. Proficient in machine learning, big data analytics, and automation. Passionate about leveraging technology for business optimization and digital transformation. Long-term aspirations include excelling as an **AI and Machine Learning Engineer**, contributing to innovative AI solutions, and shaping the future of intelligent systems across industries.

EDUCATION

Master of Information Technology (AI & Data Science), University of New South Wales, Sydney (2022 – 2024)

Specialized in AI and Data Science.

- Executive Member of PETSOC Club, UNSW.

Bachelor of Technology (Computer Science and Engineering), Dr. A.P.J Abdul Kalam Technical University (2018 – 2022)

Member of Computer Society of India and National Cadet Corps.

- Core Member of ECell, Noida Institute of Engineering and Technology.

PROFESSIONAL YEAR PROGRAMME

ACS Professional Year Programme – ICT Stream (09 February 2025 – Present)

Structured professional development programme recognised by the Department of Home Affairs for skilled migration points, combining workplace internship with industry-focused ICT training.

ENGLISH PROFICIENCY

PTE Academic – Pearson Test of English

Overall Score: **89/90** — Superior English proficiency, recognised by the Department of Home Affairs for skilled migration.

PROFESSIONAL AFFILIATIONS

- **Executive Member** – PETSOC Club, UNSW.
- **Member** – Computer Society of India.
- **National Cadet Corps (NCC)** – Certificate A Holder.

CERTIFICATIONS

- AWS Certified Machine Learning – Specialty
- Google TensorFlow Developer Certificate
- Deep Learning Specialization – Coursera
- Data Science and Big Data Analytics – edX

PROFESSIONAL EXPERIENCE

Data Analyst, Sutherland Shire Council, Sydney NSW (31 March 2025 – Present)

- Managed the extraction and transformation of **legacy system data** for decommissioning, utilising **data engineering and data management principles** for a secure cloud migration.
- Performed **data analytics and numerical analysis** to profile legacy data, identify anomalies, and implement specialised tools to systematically **clean datasets**.
- Established **enterprise data frameworks**, creating data standards, lifecycles, and analytical classification and coding structures to govern council information.
- Implemented strict **quality assurance and quality management protocols**, using measurement techniques to track **data integrity** and define quality metrics.

- Conducted **business situation analysis and business modelling** to understand the specific challenges of various business units and deliver tailored data solutions.
- Led **requirements definition and management** sessions to capture stakeholder needs and configure enterprise software systems to meet those specifications.
- Transformed complex datasets into actionable **business intelligence**, leveraging **data visualisation** to build dashboards and reports for stakeholders.
- Provided internal application support, developing detailed **working instructions** and actively **training business units** to ensure competence with new software systems.
- Ensured strict adherence to **data privacy and governance regulations** throughout the entire data migration lifecycle to secure sensitive community records.

Software Trainee, Webomates Inc. USA (April 2022 – August 2022)

- Designed and implemented multiple NLP techniques to improve accuracy for the existing AI model segment which predicts JIRA defects.
- Developed multiple **AWS lambda functions** in python to create reports and supporting tools for the AI defect predictor.
- Collated and implemented Image detection techniques like **Faster R-CNN model, YOLO V5, VGG16** for execution of project.

AI Intern, Webomates Inc. USA (October 2021 – April 2022)

- Improved JIRA defect prediction **accuracy by 15%** through developing multiple Python-based lambda functions.
- Created a program to predict similarity between two corpus using **TFIDF and SIF embeddings**.
- Collated and implemented NLP techniques like **BERT, T5, TFIDF, SIF** for execution of project.

IT Intern, Mosaic Media Ventures Pvt. Ltd., Hindustan Times House, New Delhi (March 2021 – June 2021)

- Project scope included improving functionality and performance pertaining to **CRM website (www.vccircle.com)**.
- Worked with IT department in managing CRM website.
- Implementation of **Codeigniter Framework** (PHP) was used for execution of project.

Summer Intern, Adaptive IT Systems Pvt. Ltd., New Delhi (May 2020 – July 2020)

- Designed and developed various tools using Java, Python, C++.
- Worked with MongoDB and Industry Level Codebase. **Cleaned up the database.**
- Worked with cross-functional team of design and implementation of company records and Document Management Solutions.

Summer Intern, Mantra IT Systems Pvt. Ltd., Gurgaon, Haryana (June 2019 – August 2019)

- Created database function and table based on current and proposed solutions.
- Worked on a project titled Time Sheet System. **Improved the workflow.**
- Utilized my technical expertise in SQL database, process analysis, workflow design/development.

KEY PROJECTS

Traffic Sign Recognition System (Feb 2022 – Jun 2022)

- Collected data from Kaggle to be used to train a deep learning network (GTSRB Dataset).
- Researched and implemented multiple pre-trained models for the best accuracy like **ResNet-50, VGG16**.
- Experimented multiple hyperparameters for a CNN model.
- Achieved an **accuracy of 96%** (unseen data) on a **4-layer CNN model**.

Eatery Management System, UNSW Capstone Project (Feb 2024 – May 2024)

- Frontend Development: Created a responsive UI with **React**, delivering a seamless customer experience.
- Backend Development: Utilized **Django** for backend logic and managed **REST API** calls to ensure smooth data flow between client and server.
- Recommender System: Implemented a **recommendation model** that personalizes eatery suggestions based on user preferences, enhancing search results.

TECHNICAL SKILLS

- **Programming:** Java, Python, C, C++, JavaScript (React.js, Node.js, Angular.js), PHP.

- **Machine Learning & AI:** TensorFlow, Keras, Scikit-Learn, NLP, Deep Learning.
- **Databases & Visualization:** SQL, MongoDB, Tableau, Pandas, Matplotlib.
- **Development & Deployment:** Django, Flask, Express.js, CodeIgniter, Docker, AWS CLI.
- **Software Tools:** JIRA, Jupyter Notebook, Anaconda, Git, VS Code.
